ID: 1U04-0123-0701
Assignment: 6
Course: WPL

Difference between cookies, session and JWT

Cookies:

Cookies are the small data files stored in a user browser. They store user information & help website remember user preferences.

Session:

Session stores user data on the server. They are more secure than cookies & expires when the browser is closed

JWT:

Jason Web Token is a secure method used for user authentication, it allow data transform between client and secure

Cookies	Session	JWT
1- Data stores on ~~browser~~ browser	Data stores on ~~server~~ server	Data stores on (browser/local storage)
2- It is more secure	It's less secure	Secure if signed
3- Uses server memory	No server load	No server storage (stateless)
